WHO AM I?

Hey there! I'm a fullstack software engineer passionate about human-software interaction and general software design. I am communicative when I'm not single mindedly focused on solving a problem and constantly looking for improvement in my soft and hard skills departments. I draw pleasure from writing good quality code and learning new things from other people.

I'm looking forward to working on challenging problems. If you need somebody for building great software - here I am!

JavaScript

NodeJS

Angular 6

React

HTML

CSS/SCSS

SQL

git   Mongo   Confluence   JIRA   PostgreSQL

EXPERIENCE

11/2021 – present

Full-stack engineer   **OysterHR**

Implement the front-end and back-end of the features I develop.
Some highlights:

- I rewrote more than 3k lines of JS into TS.
- Developed several user-facing featurs
- Became moderately proficient in Ruby on Rails

```
Typescript  /  Tailwind CSS  /  React  /  Ruby on Rails
```

5/2021 – 11/2021

Front-end engineer   **Amazon**

I developed UIs using different front-end frameworks. Fixed tech debt and maintained old apps that used ancient technologies. Lead the development of the front-end part of the newer projects, was in charge of picking the technologies and developing the architecture of the app. Participated in the on-call rotation.
Some highlights:

- I upgraded the version of Angular of our project from version 7 to 12 along with other related dependencies.
- Developed a project for marking different zones in a screenshot with draggable rectangles that had zoom in/out functionality with touchpad support.
- Implemented a WYSIWYG editor using the command pattern and quil.js library.

```
Angular 12  /  Angular.js  /  Rx.js  /  Typescript  /  Tailwind CSS  /  React  /
Framer Motion
```

| 5/2020 – 5/2021 | **Front-end developer** | **Luxoft** |

I developed UI components, screens and fix bugs in the UI of an app for displaying network stats from Cisco equipment and configuring them. I work in direct collaboration with the backend team from India and US management.

Some highlights:

- Introduced *rc-field-form* and implemented an abstraction layer over it.
- Developed a component that renders a customizable table with editable/removable rows with support for validation using the aforementioned form library.
- Refactored the whole Redux store (40+ actions) into slices using Redux Toolkit.

```
React.js  /  Javascript  /  SASS  /  Lodash  /  Redux Toolkit
```

| 8/2019 – 5/2020 | **Full stack developer** | **Safeguard** |

I worked on many modules that are part of the Safeguard Global system. I maintaned long SQL queries, developed modules in NodeJS and Go. I refactored big and clunky JS and SQL code into shorter and easier to understand code.

Some highlights:

- Developed several reusable higher order components used in dozens of screens.
- Refactored 10 front-end screens using those components.
- Developed a microservice in Golang.
- [Forked](#) the popular "react-paginate" component, fixed inconsistencies and optimized it.
- Wrote 10+ documentation pages on Confluence.

```
NodeJS  /  Koa.js  /  React  /  PostgreSQL  /  Go  /  RabbitMQ  /  Bootstrap 3
```

| 6/2018 – 4/2019 | **Fullstack Web Developer** | **Heavensolutions** |

I worked on a website project started from scratch which goal was connecting trip organisers with tourists. I was implicated in the development of both the front-end(Angular 6) and back-end. We were the first to use the PrivateSky framework developed by the A.I. Cuza university in a real-world software-product. I also wrote several tests for PrivateSky.

```
node.js  /  Angular 6  /  express.js  /  PrivateSky  /  Sequelize  /  Agile
```

EDUCATION

| 2016 – 2021 | **Bachelor's Degree in Computer Science** | **Alexandru Ioan Cuza University, Iași** |

```
Java  /  C++  /  Haskell  /  Oracle PL/SQL  /  Android  /  Kotlin  /  Scala
```

LANGUAGES

Romanian - native
Russian - proficient
English - proficient

HOBBIES

Running, playing football, coding, psychology
